

# Sheffield Children's Hospitals NHS Trust

**ONE of the UK's largest Child and Adolescent Mental Health services has signed an agreement to use the CareNotes electronic care record system.**

Sheffield Children's Hospitals NHS Trust has just awarded a contract to Strand Technology that will revolutionise the way its staff work with children suffering with mental health problems.

Using the web-based software will unlock huge benefits to carers across the Trust, saving time and offering new possibilities for delivering care.

Strand Technology's team will now work closely with the Trust to ensure that CareNotes is in place as quickly and efficiently as possible.

Graham Phillips, Managing Director of Strand Technology, said: "Sheffield has one of the largest CAMHS services in the country and we are delighted to be working with such a significant organisation.

"Sheffield Children's Hospitals NHS Trust needed a solution with a proven track record that would be reliable and able to handle the large numbers of complex cases associated with CAMHS services. CareNotes, without doubt, can offer this.

"CareNotes is already the market leading patient care solution within the NHS Mental Health sector and this helps reinforce our position," added Graham.

The new system is expected to be live within the next three months.

Note to Editors:

Strand is a leading I.T. software provider based in Warrington.

The company develops highly specialised computer software for the mental health sector of the NHS.

CareNotes is an Integrated Care Records compliant solution that has been developed with NHS clinicians to meet the needs of complex care within mental and social care.

It offers a highly-advanced web-based system that is ideal for specialist groups who may all be looking after a patient – for example an NHS Trust and Social Services.
